

Self-replicating Poster

https://github.com/new

A repository contains all project files, including the revision history. Already have a project repository elsewhere?
[Import a repository.](#)

Owner * Repository name *

 Lafelabs / poster ✓

Great repository names are short and memorable. Need inspiration? How about *crispy-dollop*?

Description (optional)

self-replicating poster

☒ Public
Anyone on the internet can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☒ Add a README file
This is where you can write a long description for your project. [Learn more.](#)

Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

.gitignore template: None

Choose a license

A license tells others what they can and can't do with your code. [Learn more.](#)

License: Creative Commons Z...

This will set `main` as the default branch. Change the default name in your [settings](#).

☐ You are creating a public repository in your personal account.
